Date: _____

Stephanie had 5 flower boxes that she wanted to fill. She bought 10 daisies, 5 daffodils, 5 roses, and 5 tulips.

What is the pattern of flowers she would use to make each flower box look the same?

1. What is the problem asking me to do?
(add, subtract, multiply, divide)

2. What are the facts that I need?

What is the question asked?

3. What strategy will I use?

(illustrate, act it out, manipulative, guess & check)

4. I can solve the problem. Write the equation

(# sentence) & answer in a complete sentence.

Name: _____ #:

Date: _____

Mekhi went 1 mile on his bike for the first week. The next week he went 3 miles, and he went 5 miles the week after that. Look at the number of miles Mekhi biked each week. What is the pattern?

1. What is the problem asking me to do?
(add, subtract, multiply, divide)

What is the question asked?

2. What are the facts that I need?

3. What strategy will I use?
(illustrate, act it out, manipulative, guess & check)

4. I can solve the problem. Write the equation
(# sentence) & answer in a complete sentence.

Problem: Christopher read five books in week 1. In week 2 he read a total of ten books. In week 3 he read a total of fifteen books. If he continues this pattern, how many books will he have read by week 6?

1. What is the problem asking you to do?
(add, subtract, multiply, divide)

2. What are the facts.

Write the question asked?

Illustrate the problem. Show your thinking!!

3. Solve the problem with an equation.

4. Explain, in complete sentences, how you solved the problem.

Solve the problem in a complete sentence.
